

Application: Installation, debug and repair for refrigeration industry, ventilation duct, environment monitor, navigation measurement, weather forecast, collection of the weather data for outdoor busywork and fire department.

Features:

- * This portable anemometer provides the convenience of a remote sensor separately.
- * Multifunctional. the measurement unit can be selected according to different requirements.
- * Built in temperature measurement.
- * Resistance sensor for fast temp. response time.
- * Low-friction ball-bearing design allows free vane movement.
- * A sensitive balanced vane wheel rotates freely in response to airflow.
- * Conventional twisted vane arms, always a source of unreliability has been eliminated.
- * DATA HOLD function for storing the desired value on display to read.
- * LCD display for clear readout even in bright ambient light condition
- * Wide applications: use to check air conditioning & heating systems, measure air velocities, wind speeds, temperature etc.
